

EPDM Raw Edge Cogged Belt

MAXSTAR POWER EP-X

MITSUBOSHI

Maintenance Free!!

- ▶ **Top Fabric: Cotton**
- ▶ **Cord: Polyester with Special Treatment**
▶ Superior Tension Stability
- ▶ **Rubber: High modulus EPDM**
▶ Temperature Range: -40~130°C (-40~266°F)
▶ Superior Crack resistant
▶ Weight Reduction
▶ Halogen Free
▶ High Stiffness
▶ Antistatic

- ▶ Compliant to RoHS and REACH
- ▶ Reducing downtime
- ▶ Antistatic conforming to ISO1813
- ▶ High Flexibility - Superior than standard cogged type with back idler pulley

- ▶ Power Rating is 30% higher than standard cogged type
- ▶ Energy Efficient

■ Narrow Cogged Type

(Note) Above are nominal values.

■ Wedge Cogged Type

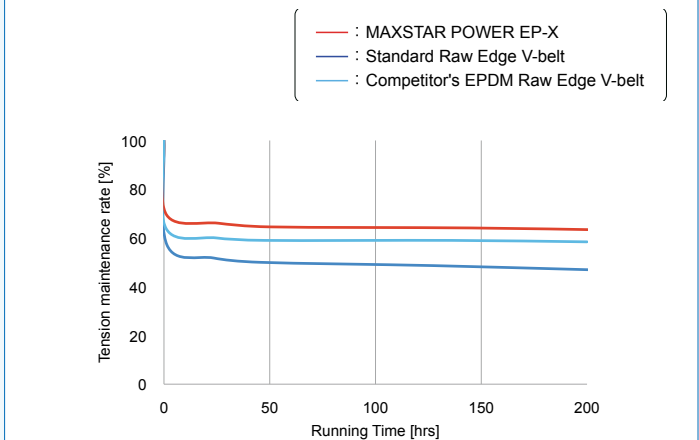

(Note) Above are nominal values.

■ Performance

EPDM rubber and new-treated PET cord enable superior performance than standard Raw Edge V-belt and Competitor's EPDM Raw Edge V-belt.

■ Tension Deteration (SPZX Type)

Toughness for severe conditions!!

MAXSTAR POWER EP-X is developed to reduce downtime of retensioning by tension stability improvement, and demonstrates its capabilities especially in these applications.

For HVAC

For Compressors

For Construction Equipment

For Industrial Pumps
